To Whom it May Concern:

We are pleased to support CatMatt Software Solutions. We have partnered with Senior Dine to register, record and track meals for our Iowa Café program, a restaurant partnership.

We have approximately 3,500 consumers registered in the Senior Dine system and it is very easy to integrate into WellSky. John and Lisa are great to work with and very responsive to any needs we have related to system updates or new reports.

In the past 6 months, we have served more than 41,000 meals to nearly 2,300 unique consumers. In the past 18 months our program expanded from two locations using the system to track consumers eating meals in the restaurant to 13 locations tracking meals consumed in the restaurant **and** those delivered to home bound seniors.

Our partners in the restaurant side have expressed to us the ease of the scanning process and real time reporting. Consumers are happy to know the number of meals they still have available at the time of purchase.

We feel that our restaurant program would have been much more difficult without using Senior Dine.

Sincerely,

Janet Buls  
Director of Nutrition Services

Gregory Zars  
Deputy Director
